NEW PRODUCT ALERT: LISTEN WITH VOICE ALERT!

Parents of active children know that watching their kids is a never-ending struggle. So take a look at the Voice Alert Driveway Alarm Monitor and Home Protection System. It includes heat-sensing motion sensors and a remote speaker. It can alert you to problem situations.

The basic system starts at $149.80. We tried out the two-sensor Voice Alert system, priced at $199.80. There's a lot to like about the Voice Alert--it's very easy to set up and the custom message recording for each sensor is great.

You'll need to be choosy about where you place the sensors, as we found they could be finicky if placed too low or too high.

The Voice Alert system isn't the cheapest surveillance system available, but its user-friendly technology makes it a pretty good value. For more details, go to:
